IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): A method of purifying lithium sulfide wherein lithium sulfide obtained by reacting lithium hydroxide with hydrogen sulfide in an aprotic organic solvent is washed, comprising reacting lithium hydroxide with hydrogen sulfide in an aprotic organic solvent to produce lithium sulfide, and washing the lithium sulfide with an organic solvent at a temperature of 100°C or higher wherein the organic solvent used for washing is N-methyl-2-pyrrolidone (NMP) and wherein [[a]] lithium N-methylaminobutyrate (LMAB) eontent in the washed lithium sulfide is present at a range of 0.1 % by weight or less.

Claim 2 (Canceled).

Claim 3 (Canceled).

Claim 4 (Currently Amended): A lithium sulfide <u>obtained by the method according to</u>

<u>Claim 1</u>, wherein a total content of sulfur oxides <u>in the washed lithium sulfide</u> is 0.15 % by

weight or less and wherein a lithium N-methylaminobutyrate (LMAB) content is 0.1 % by

weight or less.

Claim 5 (Previously Presented): A solid electrolyte for a lithium rechargeable battery comprising the lithium sulfide according to claim 4.

Claim 6 (Original): The solid electrolyte for a lithium rechargeable battery according to claim 5, wherein the ionic conductance is 1×10^{-3} S/cm or higher.

Claim 7 (Previously Presented): A solid battery comprising the solid electrolyte for a lithium rechargeable battery according to claim 5.

Claim 8 (Previously Presented): A solid battery comprising the solid electrolyte for a lithium rechargeable battery according to claim 6.

Claim 9 (Previously Presented): The method according to Claim 1, comprising: reacting lithium hydroxide with hydrogen sulfide at a temperature of 0 to 150 °C in an aprotic organic solvent to obtain a lithium sulfide;

removing the aprotic organic solvent by decantation at a temperature of 100 °C or higher under an inert gas to provide a solid lithium sulfide;

adding an fresh aprotic organic solvent to the solid lithium sulfide to provide a dispersion of lithium sulfide;

stirring the dispersion of lithium sulfide at a temperature of 100 °C or higher; and drying the stirred dispersion of lithium sulfide under a stream of inert gas at a normal pressure.

Claim 10 (Canceled).

Claim 11 (Currently Amended): The lithium sulfide according to Claim [[1]]4, wherein the lithium N-methylaminobutyrate (LMAB) content in the washed lithium sulfide is present at a range of 0.0005 % by weight or less.

Claim 12 (Currently Amended): The lithium sulfide according to Claim [[1]]4, wherein a total sulfur oxide content in the <u>washed</u> lithium sulfide is 0.001 % by weight or less.

Claim 13 (Currently Amended): The lithium sulfide according to Claim [[1]]4, wherein the total sulfur oxide content in the <u>washed</u> lithium sulfide is 0.001 % by weight or less and [[the]] lithium N-methylaminobutyrate (LMAB) content in the <u>washed</u> lithium sulfide is <u>present at a range of 0.0005</u> % by weight or less.

Claim 14 (Previously Presented): The method according to Claim 1, wherein the aprotic organic solvent in said reacting is identical to the aprotic organic solvent for washing.

Claim 15 (Previously Presented): The method according to Claim 1, wherein the temperature of the organic solvent used is lower than the boiling temperature of the organic solvent.

Claim 16 (Currently Amended): The method according to Claim 1, wherein the aprotic organic solvent in said reacting is selected from the group consisting of N,N-dimethylformamide, N,N-dimethylformamide, N,N-dimethylacetamide, N,N-dimethylformamide, N,N-dimethylacetamide, N,N-dipropylacetamide, and N,N-dimethyl benzoic acid amide, N-methylcaprolactam, N-ethylcaprolactam, N-isopropylcaprolactam, N-isobutylcaprolactam, N-n-propylcaprolactam, N-n-butylcaprolactam, and N-cyclohexylcaprolactam; N-methyl-2-pyrrolidone (NMP), N-ethyl-2-pyrrolidone, N-isopropyl-2-pyrrolidone, N-isobutyl-2-pyrrolidone, N-n-propyl-2-pyrrolidone, N-n-butyl-2-pyrrolidone, N-methyl-3-methyl-2-pyrrolidone, N-methyl-3-methyl-2-pyrrolidone, N-methyl-3-methyl-2-pyrrolidone, N-methyl-3-methyl-2-pyrrolidone, N-methyl-3-methyl-2-pyrrolidone, N-methyl-2-pyrrolidone, N-meth

Application No. 10/576,721 Reply to Office Action of June 9, 2011

methyl-2-piperidone, N-ethyl-2-piperidone, N-isopropyl-2-piperidone, N-methyl-6-methyl-2-piperidone, and N-methyl-3-ethyl-2-piperidone, or a mixture thereof.

Claim 17 (Canceled).

Claim 18 (Currently Amended): [[A]]<u>The</u> lithium sulfide obtained by the method according to Claim 9, wherein a total content of sulfur oxides in the washed lithium sulfide is 0.15 % by weight or less.
